DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0663612B1 (EP'612) optionally in view of Cavello et al (US Patent No. 4,975,363).

EP'612 discloses an antistatic composition substantially as claimed. See composition on page 8, Table in paragraphs [0055] to [0056] which contains a compound 1; the compound of formula (I), (II) on page 3, [0012] to [0013]; the definition of R_f in [0013] wherein each R_f is independently a highly fluorinated alkyl group of 1-20 carbon atoms, the term "highly fluorinated alkyl group means a group in which at least two out of three groups replacing hydrogen on the alkyl group are fluorine group and all the substituents on the carbon atom adjacent the sulfonyl group are fluorine. The binders including hydrophobic and hydrophilic are disclosed on page 7, [0046]. Cavallo et al in the abstract disclose a fluorinated organic compound which is a reaction product of polyoxyalkylene compound a fluorinated organic compound. The fluorinated organic compound in column 5, compound (VI) is within the scope of the $R_fCH_2CH_2SO_3H$ present in the claimed invention when B is an akylene group and R_f is a partially substituted with fluorine atom. It would have been obvious to the worker of ordinary skill in the art at the time the invention was made to provide an antistatic composition having a fluorochemical compound having an fluorinated compound associated with an amine taught in

Application/Control Number: 10/736,298

Art Unit: 1752

EP'612 or the compound obtained by the reaction product of polyoxyalkylene compound a fluorinated organic compound taught in Cavello et al in the composition taught EP'612 to provide a composition as claimed. Closely related homologs, analogs, isomers in chemistry may create a prima facie case of obviousness. In re Dillon 16 USPO 2d 1897, 1904 (Fed. Cir. 1990): In re Payne 203 USPO 245 (CCPA 1979); in re Mills 126 USPO 513 (CCPA 1960); In re Henze 85 USPQ 261 (CCPA 1950); In re Hass 60 USPQ 544 (CCPA 1944). A prima facie case of obviousness may be made when chemical compounds have very close structural similarity and similar utilities. "An obviousness rejection based on similarity in chemical structure and function entails the motivation of one skilled in the art to make a claimed compound, in the expectation that compounds similar in structure will have similar properties." In re Payne, 606 F.2d 303, 313, 203 USPQ 245, 254 (CCPA 1979). See In re Papesch, 315 F.2d 381, 137 USPO 43 (CCPA 1963) (discussed in more detail below) and In re Dillon, 919 F.2d 688, 16 USPQ2d 1897 (Fed. Cir. 1991) (Discussed below and in MPEP § 2144) for an extensive review of the case law pertaining to obviousness based on close structural similarity of chemical compounds. See also MPEP § 2144.08, paragraph II.A.4.(c).

Conclusion

- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thorl Chea whose telephone number is (571)272-1328. The examiner can normally be reached on M-F (9:00 5:30).

Application/Control Number: 10/736,298

Art Unit: 1752

Page 4

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F. Huff can be reached on (571)272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
